

Multiusers of a Single Device

If you have a household where multiple students share a single computer or smart device, we recommend the following actions so that users **don't accidentally access other user's accounts or schoolwork**.

Google Chrome is the recommended browser when students are utilizing various systems and websites for LCISD instruction.

ClassLink is our Single-Sign-On service that memorizes students' login credentials to the most popular digital tools utilized by our teachers.

The combination of these two tools help provide a more seamless online experience for our students. However if a single device is shared by more than one person, certain accounts can crossover. So the solution is:

BEST PRACTICE

WHEN IN DOUBT SIGN OUT

BEST PRACTICE

Below are some popular websites used and how to properly log out of them. In General students can look in the upper right portion of the screen for most logout options. And often they're within their name or profile picture icon. Other sites like Kahoot, Gimkit, Nearpod and Flipgrid are driven through a "code" for a temporary instance.
